

Karamoja Prayer Requests – June 2005

Bishop Peter: The bishop is now much stronger and has recovered from his earlier malaria. Thank God for his recovery and pray for him as he oversees the work of the church in Karamoja.

Roads & Security: Journeys by road are still dangerous. One of the men from the Nakapiripirit region recently lost his son in an ambush.

Development Work: Please continue to pray for Nelson Owilli, the Diocesan Development Officer, as he tries to further his “food for work” programme. The project has already received some funding through our link but other routes are still being investigated to provide additional funds.

Famine: During the past month there has been further rain in Karamoja. The land is now green with vegetation in many areas, although there is still famine as people have not yet been able to harvest their crops. Please pray that the crops which people have planted will grow successfully so that they will have a harvest.

DTC: All the students at the Diocesan Training Centre, Lotome, have now taken and passed their exams and returned home to their families. Please pray for them as they use their newly acquired skills and knowledge to assist local pastors in carrying out the work of the church throughout Karamoja. Pray also for the archdeacons who will advise them where they should carry out this work.

Prayer is also needed that God will prompt more people to attend courses at the DTC so that more local pastors will be able to be supported by well-trained members of their congregation.

Visit: Please pray for Rev. Joseph Lomongin as he travels to Kampala next Sunday (12th) to arrange his passport for his visit to the UK later on this year. Pray also for all the other arrangements, especially his visa application.
