

## Karamoja Prayer Requests – July 2005

**Visit:** Rev. Joseph Lomongin travelled to Kampala where he hoped to arrange his passport whilst attending a communications conference. Unfortunately, just before he left he caught malaria which didn't take hold until after he arrived. He has been confined to his bed with the illness and consequently has been unable to get to the passport office. Please pray for him, that he makes a full recovery, and also for his family as he and his wife lost a child to malaria several months ago. Please also continue to pray for the arrangements to do with Joseph's planned visit to the UK later this year. We cannot apply for his visa until he has a passport as the passport number is needed for the application.

**DTC:** Please pray for Joseph Abura, the Diocesan Training Centre Principal, who is suffering from blood pressure problems and has been in hospital. Please pray also for his family.

**Famine and Malaria:** More rain has now fallen which and the greens (cabbages, spinach etc.) which were planted several weeks ago should be ready to eat by the end of this month. The rains will also help to swell the other crops, although these will not be ready for harvest until later on. Unfortunately the surface water has given rise to a plague of mosquitoes and some people have caught malaria.

**Roads & Security:** Please continue to pray for all those travelling on the roads as safety is still a concern. Many clergy need to travel as part of their work.

**Development Work:** Please continue to pray for Nelson Owilli, the Diocesan Development Officer, as he tries to further his "food for work" programme. The project has already received some funding through our link but other routes are still being investigated to provide additional funds.
